

# ANNOUNCEMENT!

## High Speed Broadband Internet

The Lac du Flambeau Tribe is delighted to announce that we are embarking on a significant initiative to enhance our internet services. We are dedicated to bringing improved, reliable, and faster internet access to Lac du Flambeau and its residents, ensuring everyone can connect, learn, and thrive in the digital age.

After careful consideration, we have selected Elexco Inc. as our trusted partner in the development of the broadband infrastructure. Elexco Inc. has a proven track record of delivering high-quality internet services to various communities, and we are confident in their expertise and commitment to excellence. Throughout this project, you will witness the presence of Elexco Inc.'s dedicated team throughout our community. These skilled professionals will work diligently to implement the necessary infrastructure and technical advancements to empower us with enhanced internet connectivity that will then be managed by our very own Lac du Flambeau Business Development Corporation.
